

HIGH PERFORMANCE TURNING

There are 2 series of turning centers in our High Performance turning level. Both series offer rigid box way designs and powerful high output motors providing outstanding turning power to take on tough applications. For applications requiring less tools and short cycle times, the popular TA-32 model is especially design for fast gang tooling action. The GCL series turning centers have more than proven themselves in the competitive world of machine tools with over 6,000 applications world wide.

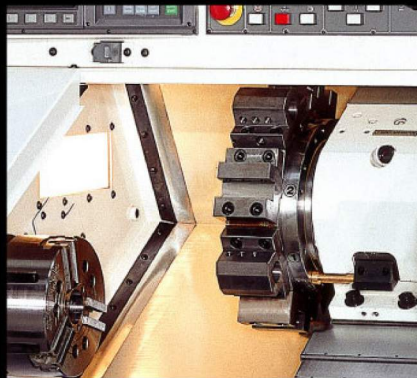

◀ TA-32

- 6" chuck size
- 1.25" (32mm) bar capacity
- 9" (230mm) maximum turning length
- 7.5 HP (Con.) / 10 HP (15 min.) spindle motor
- Gang tooling system
- Box ways on all axes

- 8" chuck size
- 2.00" (51mm) bar capacity
- 11.8" ~ 23.6" (300 ~ 600mm) maximum turning lengths
- 15 HP (Con.) / 20 HP (30 min.) high torque spindle motor
- 8-station turret (12-station optional)
- Box ways on all axes
